EXPERIENCE

Frontend Developer

Feb 2025 – Present

Procedure

- Implemented subject line A/B testing for scheduled broadcasts and optimized AI-driven templates using React-Virtuoso.
- Built a custom file manager for the email builder, enabling image uploads and asset management with Amazon S3.
- Integrated an email template library with search, filtering, and selection flows before redirecting to the editor.
- Improved type safety across complex components by adding missing TypeScript definitions and enforcing stricter type checks.
- Implemented authentication middleware to securely handle frontend and backend API requests.
- Built a resume analysis tool using Next.js and NestJS, including keyword highlighting in PDF previews.
- Converted Figma designs into pixel-perfect UI, implemented authentication flows, and added role-based route and action-level access control.

Frontend Developer

February 2024 – January 2025

Kinlotech IT Solutions

- Worked on multiple projects, including designing and developing responsive landing pages and websites with a focus on performance and user experience.
- Built a website for a church, including building the administrative side panel for content management and user interactions.
- Delivered scalable solutions across 6+ projects using ReactJS, NextJS, TypeScript, Tailwind CSS, and Shadcn UI.

Frontend Developer

Dec 2023 – Jan 2024

Crework

- Built landing pages for programs like 30 Days of PM and PM Interview Questions using React.js.
- Developed a Product Management quiz used by 500+ users with automated score reports.
- Implemented responsive UI using React.js and Tailwind CSS across devices.

PROJECTS

Trust Social | [GitHub](#), [Live Demo](#)

- Built a full-stack testimonial management platform with shareable and embeddable testimonial collections.
- Implemented dedicated landing pages for testimonial collections and support for embedding tweets as testimonials.
- Tech stack: Next.js, TypeScript, MongoDB, Tailwind CSS, Shadcn UI, NextAuth, Framer Motion.

Amigo Brain | [GitHub](#), [Live Demo](#)

- Developed a quiz platform allowing users to create and share personalized 10-question quizzes via unique links.
- Implemented leaderboards and score tracking, engaging 80+ active users.
- Built using Next.js, TypeScript, MongoDB, and Tailwind CSS.

Roast My Idea | [GitHub](#), [Live Demo](#)

- Created an anonymous social platform for sharing startup ideas and receiving community-driven feedback, reaching 400+ visitors in the first month.
- Used Redux Toolkit for scalable state management of posts and user interactions.
- Tech stack: Next.js, TypeScript, MongoDB, Tailwind CSS, Redux Toolkit, Shadcn UI.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Frameworks: ReactJS, Node.js, ExpressJS, Next.js, Redux, Tailwind CSS, Material UI, Shadcn UI, Vue.js, Nuxt

Databases & ORMs: MongoDB, PostgreSQL, Prisma

Tools & Others: Postman, Git, GitHub

EDUCATION

Deshbandhu College, Delhi University

B.Sc. Physical Sciences with Computer Science (2020-2023)

8.4 CGPA
